

1991 Four Winns 220 Horizon

This is a great boat for Lake Powell. You can travel forty miles from the nearest marina, and spend four days on the water, before needing to return. This boat has been meticulously kept dry, clean, and covered, since I bought it in 2005. The motor has been completely rebuilt, new u-joints, bellows, and no water in the drive. I only have time to visit the lake once a year, and at this time, would like to transition to offshore sailing yachts.
